

BARCODING OPTIONS

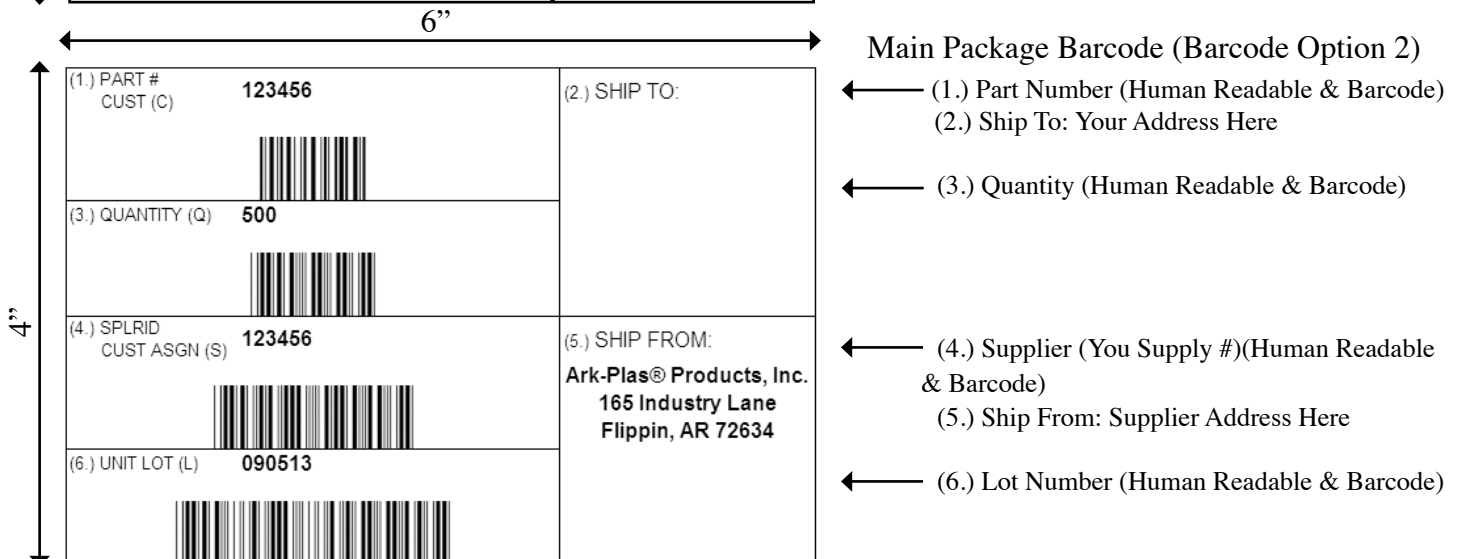

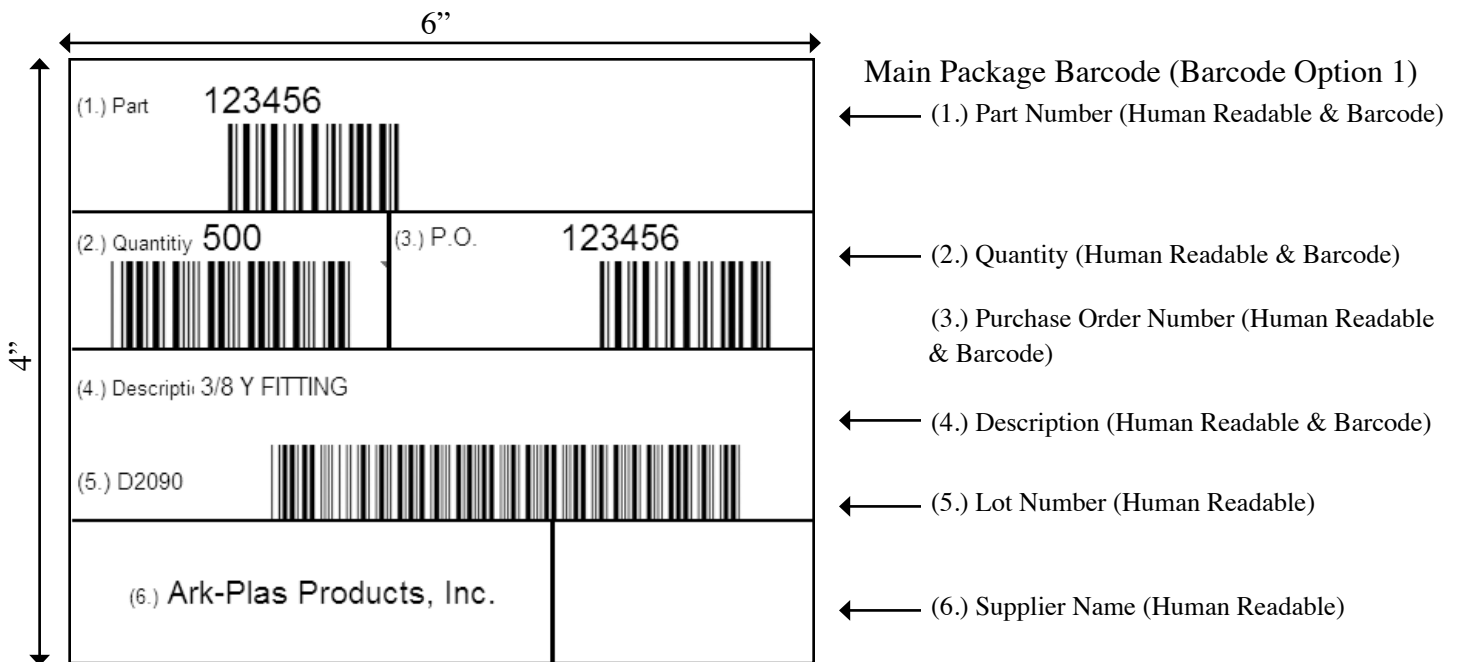

Ark-Plas® Products, Inc. is now offering a standard line of barcoding options to help streamline your Ark-Plas® product handling processes at no charge to you. Select a label from our standard barcoding options. Change any information in the numbered fields with the form on the last pages of this pdf (Ex: Part Number can be changed to Purchase Order Number, Quantity can be removed, Description barcode can be removed, Our part number can be changed to your part number, etc...) Any other custom labeling that we have to design will be a one time charge of \$15.00 and will be added to your first order. If a standard barcoding option is selected and you would like to change the numbered fields just fill out the Barcoding Variation Form at the end of this pdf and return to:
